

PRESS RELEASE

A milestone for Kobusch!

Warburg, October 29th, 2012 - Kobusch Germany, a member of Sun Capital Partners, Inc., invests in EVOLUTION 9-layer blown film technology.

Kobusch has decided to invest in the EVOLUTION technology from Reifenhäuser Kiefel Extrusion to continuously offer the most customized and differentiated flexible packaging solutions.

The EVOLUTION 9-layer blown film technology will assist Kobusch to provide:

- Ultimate and advantageous barrier screw and die head technology allowing to process a wide range of polymers, layer ratios and high outputs
- Unique haul-off design with an integrated film flattening device for flat films resulting in higher converting speeds
- Multifunction film winder ensuring perfect reel geometries even at tacky and high slip films
- Operator friendly and intuitive central line control equipped with intelligent assistants for efficient and sustainable film production

Thanks to the EVOLUTION technology, Kobusch also aims at strengthening its market position across the European borders and penetrating into new market niches.
